

Conflict Minerals Policy Statement

On August 22nd, 2012 the U.S. Security and Exchange Commission (SEC) published regulations implementing Section 1502 of the Dodd Frank Wall Street Reform and Consumer Protection Act governing “Conflict Minerals” (gold, tin, tantalum and tungsten) some of which are potentially derived from minerals obtained from the conflict-affected areas in the DRC.

I.C.P. does not directly purchase any raw Conflict Minerals from any source and is many levels far from the mines, smelters and refiners that produce the metals used in the products manufactured by I.C.P.’s suppliers that in many cases are distributors only.

I.C.P. is committed to have a Conflict Free supply chain and expects that its suppliers have due diligence processes in place to identify the source of the Conflict Minerals contained in their products, and that those sources do not support conflict and violations of human rights. Due to the complexities within the supply chain, this due diligence activity requires both time and substantial efforts to obtain the required information. To assist our customers in their due diligence efforts, I.C.P. fully intends to provide necessary information as it becomes available
